

# SWMED Final Conference

## Sustainable domestic water use in Mediterranean Regions

Tunisia: February 19- 21, 2015

The SWMED project aims to optimize the per-capita water consumption at household and urban level through the implementation of water saving devices, reuse of treated wastewater, rainwater harvesting, a pool of technologies known as Sustainable Water Management (SWM). The SWMED final conference will present the results obtained during this project's progress. This Conference will provide also keynotes, oral sessions and poster presentations for researchers and practitioners on recent developments in the water saving, water treatment reuse and recycling in urban, rural, agricultural and industrial sectors.

### CONFERENCE TOPICS

- Water saving culture in the Mediterranean regions;
- New solutions for SWM in MED settlements (urban, peri-urban and rural );
- New approaches and tools for the SWM;
- Water treatment and direct recycling in urban, rural, agricultural and industrial sectors;
- Water governance, water policy and water integrity;
- Examples of successful researches and projects.

### REGISTRATION AND ABSTRACT

Online registration to the conference is opened and compulsory at the official project website: <http://www.swmed.eu/>

Abstract submission should be addressed before the **10<sup>th</sup> January, 2014**

to : **Conference Email:** [swmed.conference@gmail.com](mailto:swmed.conference@gmail.com)
