Sharing Knowledge

First Interim Report REPORTING

A monitoring tool:

Good monitoring depends on having reliable, relevant and timely information about the activities, outputs and outcomes of your project. Do not consider regular reporting from all partners only as an administrative obligation, it is also a real opportunity to check and measure overall project progress.

A communication tool:

A jointly agreed report allows all partners to be fully aware of each other's activities and of the joint project results, and to communicate externally with one voice.

REPORTING – The Legal base

A contractual obligation designed to:

Inform the JMA on progress in project implementation progress, and/or request further pre-financing or the payment of the balance. Well-prepared and timely reporting will facilitate receiving the expected payments on time.
